Professional Summary

Results-driven Python Software Engineer with 4+ years of experience designing, developing, and deploying scalable enterprise applications and RESTful APIs across international clients in the US, UK, and Singapore. Proven expertise in Python, Django, Flask, FastAPI, and microservices architecture. Strong background in AI-integrated product development, Certificate Lifecycle Management, and cloud-native deployments using AWS, Docker, and Kubernetes. Experienced in Agile/Scrum environments, collaborative cross-functional teams, and delivering production-ready systems that reduce cost and manual effort at scale.

Technical Skills

Languages: Python, JavaScript
Frameworks: FastAPI, Django, Flask, React.js
Databases: PostgreSQL, MongoDB
Cloud & DevOps: AWS (S3, EC2, Lambda), GCP ,Docker, Kubernetes, CI/CD, Linux
AI / ML: LLM Integration, OpenAI APIs, NLP, Prompt Engineering, NER, AI-powered Applications
Integrations: ServiceNow, JIRA, Slack, PagerDuty, MS Teams, BMC Remedy
Dev Tools: Git, Postman, VS Code
Methodologies: Agile/Scrum, Microservices, RESTful API Design, System Design

Professional Experience

Senior Software Engineer — Oct 2025 – Present
Entropik — *Chennai, India*

- Entropik is an AI-powered consumer research platform. Led backend architecture for the Decode product suite.
- Led design and development of multiple backend product features using FastAPI, focusing on scalable architecture, performance optimization, and maintainability across 50+ microservices.
- Defined service boundaries and API contracts, enabling parallel frontend-backend development and reducing integration time.
- Engineered an AI-assisted moderated interview pipeline that auto-generates research insights, significantly reducing cost and eliminating manual moderation overhead.
- Collaborated closely with ML engineers, data engineers, and data scientists to productionize AI/ML models, optimize inference pipelines, and improve overall system performance.
- Improved production observability using structured logging and monitoring tools, measurably reducing incident resolution time.
- Owned system reliability and operational excellence across distributed services, including performance tuning, observability, and incident management.
- Collaborated directly with product stakeholders to gather requirements, refine feature scope, and align deliverables with business goals.
- Explored and integrated emerging AI/ML tools and technologies to deliver innovative backend solutions that addressed evolving business needs.
- Diagnosed and resolved critical production bugs under tight timelines, minimising downtime and ensuring service reliability.

Software Engineer — Apr 2025 – Oct 2025
Servion Global Solutions — *Chennai, India*

- Worked on enterprise UCaaS/CCaaS implementations using RingCentral solutions.
- Supported customer onboarding, IVR configuration, call queues, and number porting activities.
- Contributed to project documentation, automation scripts, and cross-functional delivery processes.

Software Engineer — Feb 2022 – Apr 2025
AppViewX — *Coimbatore, India*

- AppViewX is a global leader in certificate lifecycle management and network automation. Worked with enterprise clients across US, UK, and Singapore.
- Designed and delivered 100+ Python-based automation workflows for Certificate Lifecycle Management covering discovery, creation, renewal, revocation, and expiry notifications – reducing manual intervention significantly.
- Built a Django-powered CLM system that streamlined certificate operations and boosted team productivity by 67%.
- Developed and containerized Flask-based microservice APIs to automate F5 LTM object provisioning (virtual servers, pools, nodes, monitors), improving deployment speed and reducing errors.
- Leveraged FastAPI to design and deploy secure, high-performance asynchronous APIs for production environments.
- Integrated cross-platform notification workflows across ServiceNow, JIRA, Slack, MS Teams, PagerDuty, and BMC Remedy, simplifying PKI and infrastructure monitoring.
- Built and fine-tuned an AI-powered chatbot using NLP and Named Entity Recognition (NER), improving user query resolution and end-user experience.
- Developed an internal AppViewX SDK that reduced API call failures and improved overall deployment stability.
- Collaborated with Product Owners on requirement gathering, effort estimation, and functional specs; coordinated cross-functional teams to deliver high-priority features on time.
- Proficient in AWS (S3, EC2, Lambda) for scalable deployment and serverless application management; experienced with SQL and MongoDB query optimization.

Key Achievements

- **Most Valuable Player Award** – AppViewX (Sep 2023): Recognized for exceptional delivery and team contribution.
- **Circle of Excellence Award** – AppViewX (Nov 2023): Awarded for consistently outstanding performance.
- **Spot Award** – AppViewX (Jan 2024): Recognized for rapid, impactful execution on a critical project.

Education

B.E. – Electronics and Communication Engineering — 2018 – 2022
Mepco Schlenk Engineering College, Sivakasi, India — *CGPA: 8.29 / 10.0*

Additional Information

- **Relocation:** Open to relocating internationally for the right opportunity.
- **Work Authorization:** Indian passport; eligible for skilled worker visas, sponsorship required.
- **Languages:** English (Professional), Tamil (Native), French (Basic); enthusiastic about learning additional languages to support international collaboration.
- **Availability:** Available for immediate / notice period joining.
